TECH TIP

Winter-Ready Starts with Coolant and Battery Checks

Cold weather can expose weak spots in your cooling and electrical systems. Make sure your coolant mixture is winter-rated, your anti-freeze levels are correct, and your batteries are holding proper charge. A quick inspection now can prevent breakdowns and hard starts when temperatures drop. **Visit your nearest HOLT Truck Centers for a pre-winter inspection, we'll help ensure your truck is ready to perform in the cold.**
