# MARCH-APRIL 2026 ANNOUNCEMENTS

## TECH TIP

### Spring Into Comfort: Prevent A/C Downtime Before Temps Peak

As temperatures begin to climb, your truck's air conditioning system shifts into high demand, putting added strain on belts, compressors, refrigerant lines, and cooling components. A proactive pre-season inspection helps identify worn parts, restricted airflow, and small leaks before they turn into costly repairs or unexpected downtime during peak heat. A quick examination and performance check not only keeps drivers comfortable and focused, but also supports efficiency and reliability across your fleet. Don't wait for the first hot day to find out your A/C isn't ready. **Visit a HOLT Truck Centers near you to stay cool and productive all Spring.**

## PRE-SEASON A/C INSPECTION SPECIAL – \$149.99

### Stay Cool. Stay Productive. Stay Ahead of Breakdowns.

As temperatures rise, now is the time to ensure your truck's air conditioning system is ready for peak performance. Our certified technicians will perform a comprehensive inspection to identify issues early and keep your drivers comfortable and productive.

#### Service Includes:

- Check condition and tension of all drive belts
- Inspect evaporator condition and operation
- Inspect refrigerant hoses and connections for wear or leaks
- Recover and recharge refrigerant to manufacturer specifications
- Inspect cabin air filter element condition

- Clean condenser and radiator fins to improve airflow and cooling efficiency
- Start engine and operate A/C system to verify proper performance
- Verify no HVAC diagnostic trouble codes (DTC's) are present

#### ADDITIONAL SERVICES IF NEEDED:

- Cabin air filter replacement (filter and installation at additional charge)
- Leak detection and repair
- Component replacement as needed

### Employee Highlight:
